Discovery Package

If you are looking for a package that encourages self discovery and personal success, we have created a series of taster activities for your young people to take part in. The learning is experiential and based on simple and safe techniques that encourage young people to take and make decisions in an unfamiliar environment. Qualified and experienced instructors will facilitate the learning through a plan, do and review approach to ensure they have fun whilst learning essential life-lessons in and around our 45 acre lake and woodland experience area.

Watersports Package

This package will enable young people to gain the benefits of physical activity through the exhilaration of watersports such as Kayaking, Windsurfing, Stand-Up Paddling, and Sailing. They will gain the skills and techniques to take on competitive challenges suited to their ability level, whilst building self-confidence and team working attributes. The learning is progressive and well resourced using our experienced, qualified instructors to coach and review their progress. If required we are able to adapt courses leading to nationally recognised qualifications.

Residential Package

Take advantage of our lakeside location with bunk beds in rustic cabins, roll-mats in traditional tipis or overnight camping. We offer self-catering and fully catered packages to suit your needs and, with all activities on site, you are only a step away from the fun and challenges. We work with groups to develop personal qualities and co-operating over activities such as domestic chores wrapped around engaging and developmental activities throughout your stay. This is an excellent choice for leaders wanting positive changes in confidence, managing feelings, cultivating successful relationships and problem solving.

Re-Engage Package

Do you have individuals that struggle to fit within the traditional educational framework, or that regularly disrupt the learning experience of others? We have adapted programmes specifically developed to explore behaviour management, relationships, problem solving and communication, tailored to suit the individuals and engage them in fun yet challenging tasks that lead to positive outcomes through competition and discovery. An ideal investment for individuals qualifying for the Pupil Premium that can have a lasting positive impact both in and outside the classroom.
